

With the Putt Improver, you can work on improving your putting time-effectively and with pleasure, at home and on the green!

The putt improver:

improves the alignment of your entire body and clubhead  
assists you in controlling your putter and clubface  
promotes the repeatability of the correct movement  
shows you the point of contact as well as the impact of the putts  
gives you instant and permanent feedback  
is comfortable, flexible, handy and can be used everywhere  
a putt training device for golfers of all handicap levels

The basic idea:

The half hole temple is 5.2 cm wide. The ball has a diameter of 4.3 cm.

If you putt through the gates without touching, you have sunk a putt with the following length:

Distance to Gates	Holed Putt	Mark/Indoor Green	Handicap
35 cm	3,5 Meter-Putt	Front	Beginner
50 cm	5,0 Meter-Putt	Mid	Amateur
65 cm	6,5 Meter-Putt	Back	Professional

Training Manual:

The goal is to play all your putts faultlessly (without touching) through the half-hole bow.

Vary the individual distances and putt with or without tension cords. The tension cords help align your body and eyes. They also serve to control and change the swing plane.

Follow training variants:

Putt 10 balls in a row faultlessly. In case of an error, start again.

Match-Play against your training partner

Putt with eyes shut

Putt with one hand
